## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 6 and 8 are rejected under 35 U.S.C. 102(b) as being anticipated by Geigis-DE10012622A1.

Geigis-'622A1 (see drawings) shows a nostril expander device comprising tapered body or molds 1, filter or aerosol paper 8, connecting U-shaped connecting link/spring 9 substantially as recited in the claims.

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 4-5, 7, 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Geigis-DE10012622A1:

Art Unit: 3734

As to claims 4-5, 7, 9-11, Geigis-'622A1 does not explicitly disclose a specific structure of the filter. However, a particulate filter, a wad of cotton material and an activated carbon are well known forms of a filter. It would have been obvious to one of ordinary skill in the art at the time of the invention to make a filter for Geigis-'622A1 device as recited in the claims.

2. Claims 2-3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Geigis-DE10012622A1 as applied to claim 1 above, and further in view of Mehdizadeh-5,895,409.

As to claims 2-3, Geigis-'622A1 discloses substantially the claimed device, except for the molds/expanders body 1 are formed from interconnected elongate tubular members of a rubber like material. However, Mehdizadeh-'409 (Fig. 1-2, 6-7) shows an expander device formed of interconnected elongate members of an elastic material so that the device can be placed inside nostrils comfortably. It would have been obvious to one of ordinary skill in the art at the time of the invention to form Geigis-'622A1 molds or expander body 1 of interconnected elongate tubular members of a rubber like material so that the device body can be placed inside nostrils comfortably.

### ***Conclusion***
